SUBJECT INDEX

Acute lymphoblastic leukemia (ALL)
  development of care path for, 33-44
Adolescent(s)
  impact of cancer on development *(abstract)*, 94-95
  with cancer, NACHRI recommendations for home care for, 45-49
  with cancer, methods to learn about fatigue in *(abstract)*, 91-92
Adult oncology patient(s)
  pediatric bone marrow/stem cell transplant patients on combined nursing unit with *(abstract)*, 108
Agency(ies)
  pediatric home care, interview guide for selecting, 46-47
Allergic reaction(s)
  to asparaginase, monitoring for *(abstract)*, 113-114
Alloimmunization
  platelet refractoriness in transfusion therapy, 162-164
Alternative therapy(ies)
  offering options to compliment healing process *(abstract)*, 123
Ambulatory care
  specialty clinics operating within pediatric oncology clinic *(abstract)*, 108 *see also* Outpatient care
Analgesia
  establishing RN competency for administration of sedation and *(abstract)*, 125-126
Anti-human CD45 monoclonal antibodies
  for relapsed/resistant leukemia before stem cell transplant *(abstract)*, 104-105
APON, *see* Association of Pediatric Oncology Nurses
Asociacion de Hemato-Oncologia Pediatricia de Centro America (AHOPCA)
  formation of *(abstract)*, 103-104
Asparaginase
  monitoring for allergic reactions to *(abstract)*, 113-114
Assistance
  important aspects of care and, for children with cancer, 239-249
Association of Pediatric Oncology Nurses (APON)
  proceedings of 23rd Annual APON Conference, 90-132
  1999 APON award winners, 90
  clinical practice paper and poster abstracts, 100-118
  educational paper and poster abstracts, 119-132
  research paper and poster abstracts, 91-99
  proceedings of workshop on stress-sequence model, 57-82
  recommendations for home care for children/adolescents with cancer, 45-49

Bead program
  creating meaning with *(abstract)*, 100
Bereavement
  annual community hospital breakfast for parents whose children have died *(abstract)*, 117-118
Biography, *see* Narratives, illness
Biologic response modifiers
  in transfusion therapy, 168-169
BMT, *see* Bone marrow transplant
Bone marrow transplantation (BMT)
  care of children on combined adult/pediatric nursing unit *(abstract)*, 108-109
  children's perceptions of pain during 3 weeks of, 22-32
  granulocyte use in *(abstract)*, 127-128
  patient information kit in pediatric BMT unit *(abstract)*, 125
  virus-specific cytotoxic T lymphocytes *(abstract)*, 123-124
  workbook for children undergoing *(abstract)*, 129-130
Brain tumor(s)
  proactive educational intervention for children who had cranial radiation *(abstract)*, 105-106

Camp
respite, for mothers of children with cancer *(abstract)*, 115-114
Cancer pain, *see* Pain *and* Pain management
Carboplatin, with ifosfamide-etoposide (ICE)
clinical pharmacology of carboplatin in *(abstract)*, 98
toxicity to hematopoietic growth factors after *(abstract)*, 96-97
Care
continuum of, from hospital to home *(abstract)*, 106-107
important aspects of assistance and, for children with cancer, 239-249
Care map
use in pediatric home health care setting *(abstract)*, 106, 132
Care paths
development of, for acute lymphoblastic leukemia, 33-44
Caregivers
parents as, in pediatric terminal home care, 18-20
Caring encounters
nurses' opportunity to shape, using supportive care, 182-187
balancing caring relationship, 185-186
caring process, 184-185
implications for clinical practice, 186-187
"knowing" in nursing, 183-184
Celebration of Life program
for grieving parents *(abstract)*, 128
Central America
formation of pediatric oncology nursing cooperative group in *(abstract)*, 103-104
Central venous access devices (CVAD)
chemotherapy extravasation injuries with, 138
recombinant tissue plasminogen activator for occlusion of, 174-178
use of Hepzyme in removing heparin from blood drawn from, 179-181
Central venous catheter
infection rates in pediatric cancer *(abstract)*, 95-96
Chemotherapy
administration errors *(abstract)*, 101-102
creating user-friendly teaching sheets for *(abstract)*, 125-126
extravasation injuries during, evaluation and treatment, 135-148
assessment, 139-140
experimental treatment options, 143-144
legal implications, 144-145
preventive measures, 137-139
risk factors, 136
tissue destruction theories, 136-137
ifosfamide-carboplatin-etoposide (ICE)
clinical pharmacology of carboplatin in *(abstract)*, 98
toxicity to hematopoietic growth factors after *(abstract)*, 96-97
improving delivery of medications for *(abstract)*, 109
standardized orders *(abstract)*, 111
transitioning from inpatient to outpatient *(abstract)*, 113
Choices
parents', in pediatric terminal home care, 12-21
Clinical issues
radiation somnolence syndrome, 50-53
Clinical trials, in pediatric oncology
identifying nursing research priorities in, 83-87
Competency
establishing, for administration of sedation and analgesia by RNs *(abstract)*, 125-126
Computers
interactive CD-ROM for children with leukemia *(abstract)*, 119-120
provision of, for home use by pediatric patients *(abstract)*, 116-117
staff development using Web-based technology *(abstract)*, 121-122
Continuum of care
between hospital and home *(abstract)*, 106-107
Cost containment
with restructuring of outpatient pediatric oncology clinic *(abstract)*, 102-103
Cranial radiation
proactive educational intervention program for children receiving *(abstract)*, 105-106
Crisis intervention strategies
for families of children with cancer, 3-11
planned intervention phase, 9
planning phase, 8-9
resolution and follow-up services phase, 9-10
for families of children with cancer
assessment phase, 7-8
Crisis theory, 4-7
double ABCX model of family adaptation, 6
eclectic crisis intervention theory, 6-7
general systems theory, 5-6
Hill's ABCX crisis model, 5-6
Cultural perspectives
on aspects of pediatric oncology nursing *(abstract)*, 104
Cytomegalovirus (CMV) infection
transfusion-acquired, 169-170

Death, of child
Celebration of Life program for grieving parents *(abstract)*, 128
Decision making
in pediatric oncology, international study of *(abstract)*, 91
Development
impact of cancer on adolescent *(abstract)*, 94-95
Documentation
of chemotherapy extravasation injuries, 145
Doxorubicin
liposomal, for decreasing extravasation injuries, 143-144
Dying children
parental choices and control in pediatric terminal home care, 12-21

Education
needs of hospices caring for children with cancer *(abstract)*, 120
nursing staff development
establishing RN competency for administration of analgesia and sedation *(abstract)*, 124-125
incentive for, for nurses doing shared care in United Kingdom *(abstract)*, 121
on granulocytes in bone marrow transplantation *(abstract)*, 127-128
on pediatric oncology pain management, 156
on umbilical cord transplants *(abstract)*, 126
on virus-specific cytotoxic T lymphocytes *(abstract)*, 123-124
quick reference guide *(abstract)*, 128-129
using Web-based technology *(abstract)*, 121-122
for parents of patients
on pediatric oncology pain management, 156
preparation guide for children's surgery *(abstract)*, 129
Spanish language materials for *(abstract)*, 131-132
in patients' schools
cancer awareness program for middle school students *(abstract)*, 119
proactive intervention for children who had cranial radiation *(abstract)*, 105-106
patient
brochure on pediatric peripheral blood stem cell collection *(abstract)*, 130 cancer awareness program for/about middle school students *(abstract)*, 119 care of new central line *(abstract)*, 131 conditioning regiments in stem cell transplanation and gonadal function *(abstract)*, 127
information kit in pediatric BMT unit (abstract), 125
interactive CD-ROM for children with leukemia *(abstract)*, 119-120
presurgical preparation program *(abstract)*, 129
user-friendly chemotherapy teaching sheets *(abstract)*, 125-126
workbook for children undergoing marrow and stem cell transplants *(abstract)*, 129-130
Epstein-Barr virus infection
after bone marrow transplant, educating nurses on *(abstract)*, 123-124
Ethical issues
nurses as moral agents for patients, 250-252
Ethnography
for qualitative research in children with cancer, 197-200
Etoposide, with ifosfamide-carboplatin (ICE)
toxicity to hematopoietic gorwth factors after *(abstract)*, 96-97
Expectations
of pediatric oncology nurse *(Roadmaps)*, 88-89
Extravasation injuries
during chemotherapy, evaluation and treatment of, 135-148
assessment, 139-140
experimental treatment options, 143-144
legal implications, 144-145
preventive measures, 137-139
risk factors, 136
tissue destruction theories, 136-137
treatment, 140-143

Family crisis theories, 5-7
double ABCX model of family adaptation, 6
eclectic crisis intervention, 6-7
general systems theory, 5
Hill's ABCX crisis model, 8-9
Family(ies), of pediatric oncology patients
Celebration of Life program *(abstract)*, 128
crisis intervention strategies when caring for, 3-11
inspiring hope in, by presence of survivors *(abstract)*, 112-113
measuring social support for siblings, 229-238
parental choices and control in pediatric terminal home care, 12-21
see also Mother(s), Parent(s), *and* Sibling(s)
Fatigue
methods to learn about in adolescents with cancer *(abstract)*, 91-92

Graft-versus-host disease
transfusion-associated, 170
Granulocytes
use in bone marrow transplantation *(abstract)*, 127-128
Grief
Celebration of Life program for families *(abstract)*, 129
impact of workshop on perceived stress of nurses, 63-64
workshop for experienced nurses, 78
Grounded theory
for qualitative research in children with cancer, 194-197

Handwashing compliance
by nurses in pediatric medical-surgical unit *(abstract)*, 111-112
Health care
past use of stress-response sequence model in, 69-71
Hematology/oncology care map
use in pediatric home health care setting *(abstract)*, 106, 132
Hematopoietic growth factors
toxicity to, following ICE chemotherapy *(abstract)*, 96-97
Heparin
Hepzyme for removal of, from blood drawn from central venous access devices, 179-181
Hepzyme
for removing heparin from blood drawn from central venous access devices, 179-181
Home care, pediatric
adequate pain management from hospital to, 149-159
continuum of care from hospital to *(abstract)*, 106-107

for children/adolescents with cancer, NACHRI recommendations for, 45-49
achieving excellence in, 48-49
childhood cancer and, 48
interview guide for selecting home care agency, 46-47
rationale for shifting care to, 47-48
hematology/oncology care map use in *(abstract)*, 106, 132
terminal, parental choices and control in, 12-21
dying child's influence in decision making, 18
parents as caregivers, 18-20
versus hospital or hospice, 17-18
Hope
inspiring in patients/families by presence of survivors *(abstract)*, 112
Hospice
education needs of *(abstract)*, 120
parents choice of home care vs., for terminally ill child, 17-18
Hospital(s)
adequate pain management from hospital to home, 149-159
development of institution-based standards for, 157
annual bereavement breakfast for parents whose children have died at *(abstract)*, 117-118
continuum of care to home care from *(abstract)*, 106-107
development of care path for acute lymphoblastic leukemia, 33-44
growing pediatric oncology in *(abstract)*, 114-115
parents' choice of home care vs., for terminally ill child, 17-18

Ifosfamide-carboplatin-etoposide (ICE) chemotherapy
clinical pharmacology of carboplatin in *(abstract)*, 98
toxicity to hematopoietic growth factors after *(abstract)*, 96-97
Illness narrative(s)
for qualitative research in children with cancer, 202-204
Infection(s)
rates of, in central venous catheter *(abstract)*, 95-96
transmitted by transfusion, 169
cytomegalovirus, 169-170
Inpatient care, *see* Hospital(s)
International pediatric oncology nursing
decision making in pediatric oncology *(abstract)*, 91
education incentive for nurses in shared care in United Kingdom *(abstract)*, 121
important aspects of care and assistance for children with cancer, 239-249
learning from our colleagues *(Editorial)*, 191
Intrathecal chemotherapy
proactive educational intervention for children who have had *(abstract)*, 105-106
Irradiation, total body
outpatient, for pediatric stem cell transplant patients *(abstract)*, 107

Journal of Pediatric Oncology Nursing
increase in international submissions to *(Editorial)*, 191
mentoring program for new authors *(Editorial)*, 1-2
Journals
parent-held shared-care *(abstract)*, 110-111

Langerhans cell histiocytosis
multidisciplinary care of child with *(abstract)*, 103
Legal issues
chemotherapy extravasation injuries, 144-145
Leukemia
acute lymphoblastic, development of care path for, 33-44
interactive CD-ROM for children with *(abstract)*, 119-120
proactive educational intervention for children who had intrathecal chemotherapy *(abstract)*, 105-106
use of anti-human CD45 monoclonal antibody before allogeneic stem cell transplant *(abstract)*, 104
Liposomal doxorubicin
for decreasing extravasation injuries, 143-144
Lymphocytes
virus-specific cytotoxic T, educating nurses on *(abstract)*, 123-124

Meaning
creation of, with bead program *(abstract)*, 100
Medical center(s)
growing pediatric oncology in a general *(abstract)*, 114-115
see also Hospital(s)
Mentoring program
for potential authors for JPON *(Editorial)*, 1-2
Monitoring
for asparaginase allergic reactions *(abstract)*, 113-114
Moral agents
nurses as, for patients, 250-252
Mother(s), of pediatric oncology patients
respite camp for *(abstract)*, 115-116
understanding mothers' responses to child's stem cell transplantation *(abstract)*, 93-94

NACHRI, *see* National Association of Children's Hospitals and Related Institutions
Narrative(s), illness
for qualitative research in children with cancer, 202-204
National Association of Children's Hospitals and Related Institutions (NACHRI)
home care requirements for children/adolescents with cancer, 45-49
process to develop a care path for acute lymphoblastic leukemia, 33-44
Nausea
guide for assessing pediatric vomiting, retching, and *(abstract)*, 94

Nurse(s), *see* Pediatric oncology nurse(s)
Nurse-Sibling Social Support Questionnaire, 232-234

Outpatient care
  total body irradiation for pediatric stem cell transplant patients *(abstract)*, 107
  transitioning inpatient chemotherapy to (abstract), 113
  see also Ambulatory care

Pain
  children's perceptions of during bone marrow transplant, 22-32
Pain management
  establishing RN competency for administration of *(abstract)*, 124-125
  implementing initiative for in pediatric stem cell transplant setting *(abstract)*, 105
  nurses' perceptions of factors related to undertreatment *(abstract)*, 97
  review of, in pediatric oncology, 149-159
  between hospital and home, 155-156
  current guidelines, 149-151
  developing institution-based standards for, 157
  elevating pain to disease status, 156
  improved education and support of patients/families, 156
  in the home, 152-155
  increased education of healthcare professionals, 156
  obstacles to adequate, 151
  ongoing research efforts, 157-158
  parents' role in, 151-152
Parent(s), of pediatric oncology patients
  annual bereavement breakfast at community hospital for *(abstract)*, 117-118
  choices and control in terminal home care, 12-21
  parent-held shared-care journals *(abstract)*, 110-111
  role in pain management, 151-152
  see also Family(ies)
Patient education, *see* Education, patient
Patient satisfaction
  restructuring of outpatient pediatric oncology clinic based on *(abstract)*, 102-103
Patients' perspective, *see* Roadmaps
Pediatric Oncology Group (POG)
  identifying nursing research priorities for clinical trials, 83-87
Pediatric oncology nurse(s)
  establishing RN competency for administration of sedation and analgesia *(abstract)*, 124-125
  expectations of *(Roadmaps)*, 88-89
  handwashing compliance *(abstract)*, 111-112
  reducing stress among, using stress-response sequence model *(Workshop Proceedings)*, 57-82
  consensus statements, 81-82
  critique of, 72-75
  historical development of and past use of in healthcare, 69-71
  implications of use of in pediatric oncology nursing, 78-80
  mediation of, with problem-solving skills training *(Commentary)*, 76-77
  reducing stress among pediatric oncology nurses *(Editorial)*, 57-58
  testing of, in pediatric oncology nursing, 69-71, 92-93 *(abstract)*
  shaping the caring encounter, with supportive care, 182-187
Pediatric oncology nursing
  cultural perspectives on *(abstract)*, 104
  formation of a Central American cooperative group *(abstract)*, 103-104
  international
  important aspects of care and assistance, 239-249
  learning from our colleagues *(Editorial)*, 191
proceedings of APON workshop on stress-sequence model in, 57-82
  consensus statements, 81-82
  critique of, 72-75
  historical development of and past use of in healthcare, 69-71
  implications of use of in pediatric oncology nursing, 78-80
  mediation of, with problem-solving skills training *(Commentary)*, 76-77
  reducing stress among pediatric oncology nurses *(Editorial)*, 57-58
  testing of, in pediatric oncology nursing, 69-71, 92-93 *(abstract)*
Peripheral blood stem cell collection
  educational brochure for pediatric *(abstract)*, 130
Phenomenology
  for qualitative research in children with cancer, 200-202
Platelet transfusion therapy, 161-164
  approaches to, 161
  refractoriness and alloimmunization, 162-163
  threshold, 161-162
POG, *see* Pediatric Oncology Group
Primary nursing
  and shared governance *(abstract)*, 100-101
Process improvement
  for delivery of chemotherapy medications, 109
Psychosocial functioning
  assessment of in pediatric cancer patients who are off therapy *(abstract)*, 95
Psychosocial stresses
  crisis intervention strategies for families of children with cancer, 3-11

Qualitative research
  in children with cancer
  biography or illness narratives, 202-204
  critical review of, 207-228
  ethnography, 197-200
  grounded theory, 194-197
  introduction to conducting, 196-206
  major themes evolving from, 208, 217-222
  phenomenology, 200-202

recommendations, 222-226
summary of studies, 209-217
Quality enhancement
for delivery of chemotherapy medications *(abstract)*, 109
Quality of life
enhancement of by providing computers *(abstract)*, 116-117

Radiation
outpatient total body, for pediatric stem cell transplant patients *(abstract)*, 107
Radiation somnolence syndrome, 50-53
Recombinant tissue plasminogen activator
for central venous access device occlusion, 174-178
Red blood cell transfusion therapy, 167-168
Research, in pediatric oncology nursing
identifying priorities for clinical trials, 83-87
methods to learn about fatigue in adolescents with cancer, 91-92
qualitative
critical review of, 207-228
introduction to conducting, 192-206
Respite care
camp for mothers of children with cancer *(abstract)*, 115-116
Restructuring
of outpatient pediatric oncology clinic *(abstract)*, 102-103
Retching
guide to assessing pediatric nausea, vomiting, and *(abstract)*, 94
Roadmaps column
expectations, 88-89
in pediatric oncology nursing career, 54-55
looking back, looking forward, 188-190
what it's like, 253-254
Rotationplasty
video for patients on *(abstract)*, 130-131

School performance
assessment of, in pediatric cancer patients who are off therapy *(abstract)*, 95
School-aged children
proactive educational intervention program for *(abstract)*, 105-106
with cancer, re-entry program for *(abstract)*, 98-99
Sedation
establishing RN competency for administration of analgesia and *(abstract)*, 125-126
Shared care
education incentive for nurses participating in *(abstract)*, 121
parent-held journals of *(abstract)*, 110-111
Shared governance
primary nursing and *(abstract)*, 100-101
Siblings, of children with cancer
measuring social support for, 229-238
Nurse-Sibling Social Support Questionnaire, 232-234
Social support
measurement of, for siblings of children with cancer, 229-238
Nurse-Sibling Social Support Questionnaire, 232-234
Somnolence syndrome
radiation-induced, 50-53
Spanish language materials
for parents on care of child with cancer *(abstract)*, 131-132
Specialty clinics
within an ambulatory pediatric oncology clinic *(abstract)*, 108
Staff development
using Web-based technology *(abstract)*, 121-122
see also Education
Standardized orders
for chemotherapy *(abstract)*, 111
Stem cell transplantation
allogeneic, use of anti-human CD45 monoclonal antibodies in prior to *(abstract)*, 104-105
care of pediatric patients on combined adult/pediatric nursing unit *(abstract)*, 108-109
implementing a pain initiative in pediatric setting for *(abstract)*, 105
management plans *(abstract)*, 114
mothers' responses during *(abstract)*, 93-94
outpatient total body irradiation for pediatric patients undergoing *(abstract)*, 107
patient education on effects of conditioning regimen on gonadal function *(abstract)*, 127
workbook for children undergoing *(abstract)*, 129-130
Stress
understanding mothers' responses of child's stem cell transplant *(abstract)*, 93-94
Stress-response sequence model *(Workshop Proceedings)*, 57-82
consensus statements, 81-82
critique of, 72-75
conceptual adequacy, 72-73
empirical adequacy, 74
future directions, 74
pragmatic adequacy, 74
theoretical adequacy, 73-74
historical development of and past use of in healthcare, 69-71
implications of use of in pediatric oncology nursing, 78-80
grief workshop for experienced nurses, 78
tailoring to meet individual needs, 79
videotape for new nurses, 78-79
mediation of, with problem-solving skills training *(Commentary)*, 76-77
reducing stress among pediatric oncology nurses *(Editorial)*, 57-58
testing of, in pediatric oncology nursing, 69-71, 92-93 (abstract)
development of stressor scale, for, 62-63
impact of grief workshop, 63-64
in new and experienced nurses, 61-62

peak and nadir experiences described by, 65-70
testing revised model, 66-67
Supportive care
definition and importance of in pediatric oncology *(Guest Editorial)*, 133-134
evaluation and treatment of chemotherapy extravasation injuries, 135-148
assessment, 139-140
experimental treatment options, 143-144
legal implications, 144-145
preventive measures, 137-139
risk factors, 136
tissue destruction theories, 136-137
treatment, 140-143
Hepzyme use for removing heparin from blood drawn from central venous access devices, 179-181
pain management, review of, in pediatric oncology, 149-159
between hospital and home, 155-156
current guidelines, 149-151
developing institution-based standards for, 157
elevating pain to disease status, 156
improved education and support of patients/families, 156
in the home, 152-155
increased education of healthcare professionals, 156
obstacles to adequate, 151
ongoing research efforts, 157-158
parents' role in, 151-152
patient's perspective *(Roadmaps)*, 188-190
recombinant tissue plasminogen activator for central venous access device occlusion, 174-178
shaping the caring encounter, 182-187
balancing caring relationship, 185-186
caring process, 184-185
implications for clinical practice, 186-187
"knowing" in nursing, 183-184
transfusion therapy, current and future trends, 160-173
biologic response modifiers, 168-169
cytomegalovirus infection acquired by, 169-170
graft-versus-host disease associated with, 171
infection transmission, 169
platelet transfusion threshold, 161-162
platelet refractoriness, alloimmunization, 162-164
platelet transfusion approaches, 161
red blood cell transfusion, 167-168
white blood cell transfusion, 164-167
Surgery
preparation program for parents and children having *(abstract)*, 129
video for patients on rotationplasty *(abstract)*, 130-131
Survivor(s), of childhood cancer
inspiring hope in patients/families by presence of *(abstract)*, 112
Ontario After Care Clinics for *(abstract)*, 109-110
Sweden, pediatric oncology nursing in
important aspects of care and assistance for children with cancer, 239-249

Teaching strategy(ies)
in proactive educational intervention program *(abstract)*, 105-106
see also Education, patient
Terminally ill children
parental choices and control in home care for, 12-21
Tissue plasminogen activator (TPA)
recombinant, for central venous access device occlusion, 174-178
Total body irradiation
outpatient, for pediatric stem cell transplant patients *(abstract)*, 107
Transfusion therapy
current and future trends, 160-173
biologic response modifiers, 168-169
cytomegalovirus infection acquired by, 169-170
graft-versus-host disease associated with, 171
infection transmission, 169
platelet transfusion threshold, 161-162
platelet refractoriness, alloimmunization, 162-164
platelet transfusion approaches, 161
red blood cell transfusion, 167-168
white blood cell transfusion, 164-167

Umbilical cord transplants
state of the art *(abstract)*, 126
United Kingdom
education incentive for nurses participating in shared care in *(abstract)*, 121

Vesicant agents, chemotherapeutic
extravasation injuries, evaluation and treatment, 135-148
Videotape(s)
for new nurses, use of stress-response sequence model in, 78-79
on rotationplasty, for patients *(abstract)*, 130-131
Viral infections
virus-specific cytotoxic T lymphocytes, educating nurses on *(abstract)*, 123-124
Vomiting
guide for assessing pediatric nausea, retching, and *(abstract)*, 94

Web-based technology
staff development using, 121-122
White blood cell transfusion therapy, 164-167
